ScanSync

SMART ATTENDANCE.

01 PROBLEM

- Manual attendance is error-prone
- Time-consuming processes
- Difficult to track and manage records
- Lack of real-time visibility

02 SOLUTION

ScanSync QR code system

- Instant, automated attendance tracking
- Reduces errors and saves time
- Secure, reliable, and easy to use

03 METHODOLOGY

- Requirement analysis
- Design app interface and QR system
- Develop and integrate core features
- Pilot test in classrooms
- Evaluate feedback
- and refine

04

TIMELINE
- **RESEARCH: MONTH 1-2**
- **DEVELOPMENT: MONTH 3-4**
- **TESTING: MONTH 5**

Research
Month 1–2

Development
Month 3–4

Testing
Month 5

Pilot
Month 6

Deployment
Month 7

IMPACT
- IMPROVED ACCURACY
- STREAMLINED REPORTING

- Improved attendance accuracy
- Streamlined processes and reporting
- Real-time insights for better decisions
- Enhanced accountability and transparency
- Supports data-driven educational outcomes
